

True Expertise from Castle Inspection Service

PROFESSIONAL | SPECIALIZED | TRUSTED

With a reputation of distinction and innovation, Castle Inspection Service is the most progressive provider of residential surveys and replacement costs.

About Castle

Established in 1991, Castle Inspection Service is a proven expert with a reputation as the industry leader for high value residential insurance surveys. Castle has completed more than 1 million high value inspections. Many companies will trust no other vendor with their most important accounts.

Our High Value Appraisers

The majority of our high value appraisal staff is comprised of former contractors, underwriters, adjusters, loss control consultants, architects and real estate appraisers. However, regardless of prior experience, each Castle Representative is required to complete our one-of-a-kind training program. This comprehensive program consists of both classroom and on-site field training to cover all aspects of construction, pricing and risk mitigation. Appraisers then continue their pricing research by developing relationships with local builders and architects, ensuring the accuracy of our replacement cost valuations and enhancing their expertise and knowledge of reconstruction costs in their region.

To conduct a Castle appraisal, the representative must pass a drug screening and thorough

background check. This inquiry includes, but is not limited to, consumer credit history, education, professional licensing, criminal history (state and federal), terror watch list and driving records.

Our On-site Appraisals

All Castle High Value Inspections are by appointment only and generally take 1 to 2 hours to complete. All representatives are required to carry photo ID. While at the home, the Castle Representative will:

- + Make an introduction and obtain permission to survey the home
- + Interview the homeowner
- + Take photos of the interior, exterior and any additional structures
- + Measure the perimeter of the home

The Castle Representative is an objective, third-party information provider who does not participate in decisions regarding homeowner policies. A homeowner should contact their insurance representative directly with any questions related to their policy.
